

Features

Personalised insights

Simply answer the questions below and let OWise deliver personalised information about your diagnosis and treatment - helping you to have better discussions with a doctor or nurse.

Everything in one place

OWise keeps all of your information such as appointments, prescriptions and doctor's notes in one place so that you can easily and simply access them at any time for reference.

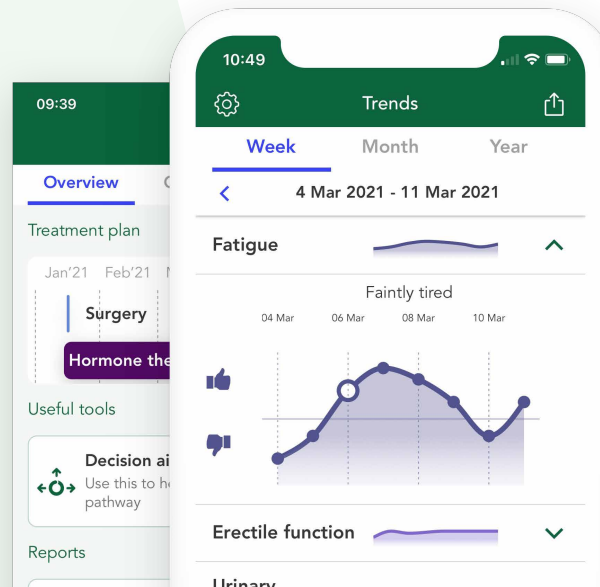

Better communication

Track and review precisely how you have been feeling. Sharing this with your care team helps them to better understand your side effects and symptoms to deliver the best care possible.

What is OWise?

Already used by thousands, **OWise** is your own personal cancer support app to help you regain control of your life from the first day of diagnosis. Let **OWise** support you with safe and reliable information while collating valuable insights about your day-to-day wellbeing that can assist your medical team in making informed decisions about on-going treatment.

Patient quotes:

“the **OWise** prostate cancer app will provide a very useful resource for patients from diagnosis, through treatment options and into recovery. It provides an easy-to-use experience and enables so much helpful information to be easily accessible in one place.” **Richard**

“This new app is a valuable addition for men with prostate cancer who want to record useful information about their cancer over time.” **Rob**
